PROFESSIONAL EXPERIENCE

Imperio Gafico - Web and Graphic Designer   **2019 - 2021**

- I have designed user interfaces that prioritize accessibility and mobile-first approach, resulting in improved user experience.
- I have enhanced the UI/UX of applications and websites by employing design tools.
- I spearheaded the initiative to implement web development in my previous company, which led to a substantial increase in client acquisition.
- I developed websites using HTML, CSS, JavaScript, React.js, as well as design tools such as Figma, Illustrator, Photoshop and Corel.

TECHNICAL SKILLS

- JavaScript
- TypeScript
- React
- Next.Js
- Astro
- Svelte
- Node.js
- MondoDB
- GraphQL
- Figma
- Illustrator
- Photoshop

PROJECTS

Chatverse - Frontend and Backend   **Jul 2023 - Oct 2023**

Developed a real-time chat application, ChatVerse, using **Next.js**, **TypeScript**, **Tailwind CSS**, and **MongoDB**. The app allows users to engage in chat conversations with real-time updates and messages stored securely in a **MongoDB** database. For quality assurance, I implemented end-to-end testing with **Cypress**. This project showcases my expertise in building modern web applications with a focus on performance, security, and a seamless user experience.

Jobstracker - Frontend   **May 2023 -Jun 2023**

Developed an award-nominated job tracking and management tool using **Next.js**, **React.js**, and **Tailwind CSS**. This web application assists users in organizing their job search efforts by tracking job listings, application status, and relevant details. The project was recognized as a finalist in the **Infojobs hackathon**, showcasing its innovative approach and practical utility. This project highlights my proficiency in building practical, user-focused web applications with a strong emphasis on frontend development.

Shoppyfree - Frontend and Backend   **Feb 2023 - Mar 2023**

Developed a dynamic e-commerce web application using **Next.js**, **TypeScript**, **Tailwind CSS**, **MongoDB**, and **Stripe** integration. The app offers a user-friendly shopping experience with secure payment processing through **Stripe**. Data is stored and managed in a **MongoDB** database, ensuring scalability and performance. This project demonstrates my proficiency in building robust and feature-rich e-commerce platforms with a focus on frontend technologies and secure payment processing

Notes app - Frontend and Backend   **Aug 2022 - Mar 2023**

I developed a notes app using **React.js**, **Node.js**, and **MongoDB**, with testing conducted using **Jest**, **Cypress**, and **React Testing Library**. The app enables users to create, read, update, and delete notes from the command line, demonstrating my proficiency in building scalable fullstack applications with popular web development technologies.

Xkcd - Frontend and Backend   **Sep 2022 - Oct 2022**

I developed an XKCD comics web app using **Next.js**, **Tailwind CSS**, and **NextUI**, with **Algolia** used for search functionality. The app enables users to browse through an extensive collection of comics and search for specific comics based on keywords. To populate the collection, I developed a web scraper using **Node.js** to extract data from the XKCD website. The use of Next.js, Tailwind CSS, and NextUI enabled me to build a highly responsive and visually appealing app with minimal overhead, while the integration of Algolia improved the search functionality.

EDUCATION

LOGISTICA EMPRESARIAL - SENA   **2016 - 2019**
GRAPHIC/WEB DESIGN - SENA   **2018 - 2019**

CERTIFICATIONS

English - King's College London   **2023**
Professional Fundamentals of Software Development - Microsoft y LinkedIn   **2023**
Python programming - MIT   **2020 - 2021**
